

2025 Highlights & Achievements

In 2025, we achieved significant growth in orders and delivered outstanding results in our prototyping activities. These successes were made possible thanks to your collaboration and unwavering support.

As we move forward, 2026 brings new opportunities and challenges. we look forward to continuing our collaboration and achieving even greater accomplishments together.

2026 New activity : HARNESS

To support customer's need, we engaged a new scope of supply :

Harness Manufacturing

The Harness initiative started from a spontaneous customer call. One year later, the PPAPs have been validated for over 10,000 parts annually.

The manufacturing process includes cutting and stripping wires to precise lengths, crimping terminals, assembling wires into connectors, applying protective taping, Individual labelling for traceability and performing rigorous electrical and mechanical testing before final packaging. All this ensuring a reliable and fully functional electrical system.
