

WINDECO ADDED VALUES

✓ Providing production-focused engineering support

- Process development
- Machining simulation
- Cycle-time optimisation

✓ Identifying improvement opportunities

- Quality-related improvement
- Cost saving
- Maximizing manufacturing efficiency

WINDECO'S TWO MAIN SUCCESSFUL PROJECTS

» Engineering study :

From a full machined component to a plastic overmolded part

Result : 40% cost saving
(+/- 5 million€/year)
Application : Automotive

» Cycle time optimisation:

Improvement of cycle time from 32" to 24"

Result : Investment savings of 7 machines out of the 27.
Application : Automotive
