

TURNING - INDIA - 1

CATEGORY : BRASS TURNING

Headquarter : 
Plants: 

I. HISTORY

A manufacturer of precision BRASS turned component founded in 2000 and located in India.

Active investment in modern manufacturing technology, quality accuracy, measuring & testing equipments and R & D facility company has successfully developed precision turned components, fasteners, sheet metal components, earthing & wiring accessories, cable glands.

Apart from standard product, company is also specialized and engaged in production of machined, turned, press and forged component as per technical drawing or other relevant data.

II. MAIN BUSINESS SEGMENTS & CUSTOMERS

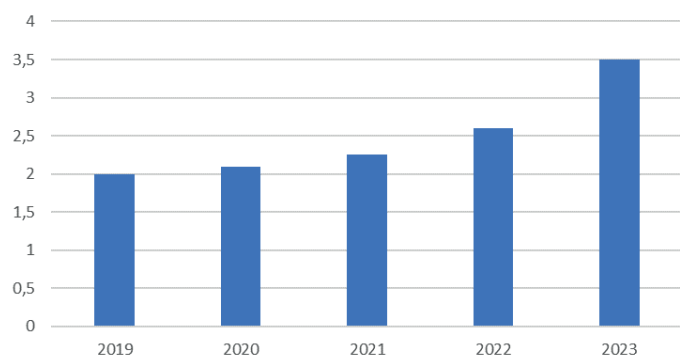

>125 employees

3.5 M €

Turnover in M€

Main customers :

Amphenol

CONTRINEX

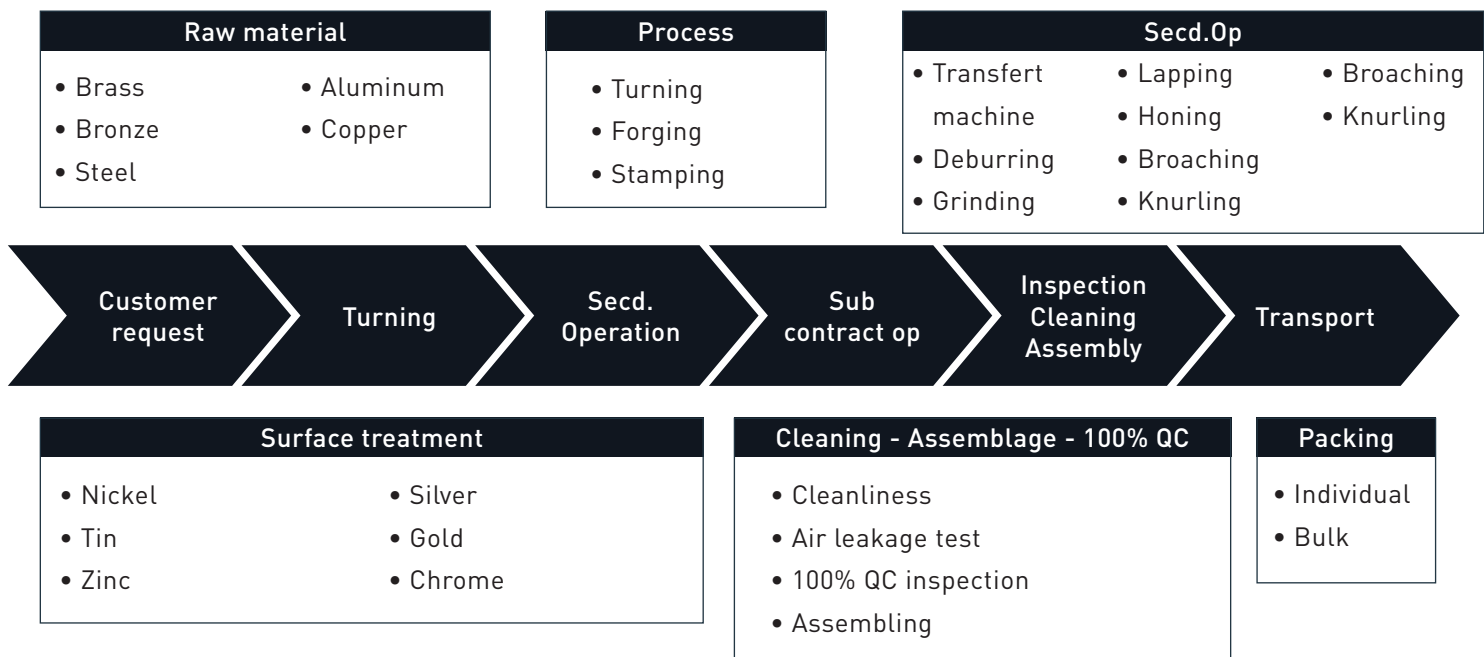

III. CAPACITIES:

- CNC Sliding Head Machines
- CNC Turning Machines
- Automatic Turning Machine
- Automatic Trobe Type Machine
- Drilling Machines
- Threading Machines
- Cutting Machines
- Milling
- Marking Machine

Diameter from 1.5 to 200 mm and length to 400 mm

IV. PROCESS

V. ORGANIZATION

Plant in India

VI. SPECIFICITY & PARTICULARITY

Specialist in BRASS material

VII. CERTIFICATION

- ISO 9001:2015
- IATF 16949

VIII. PRODUCTS

Automotive parts

Electrical components

General Engineering

Sanitary components
